

28 January 2014

## **First 1,000MW Ultra-Supercritical Unit in Zhejiang Cangnan Commenced Operation**

China Resources Power Holdings Company Limited (“CR Power”, Stock Code: 836) today announced that the first 1,000MW ultra-supercritical unit of Zhejiang Cangnan Power Plant successfully completed a 168-hour full load pilot run, and commenced commercial operation on 24 January 2014. The plant is fully equipped with environmental facilities, including desulphurization, denitration and ash removal facilities.

Zhejiang Cangnan Power Plant is located in Cangnan County in Wenzhou, Zhejiang Province. The approved on-grid tariff is RMB 457.0/MWh (inclusive of VAT), pending approval for tariff subsidies for denitration and ash removal. CR Power owns an effective 75% equity interest.
